

ENERGY DATA AT YOUR FINGERTIPS?!

Jointly organised by the European Commission - DG Energy, ESMIG and EER

Tuesday 16 June 2020, 10h00 to 12h00
Webinar

Summary

Efficient, secure, non-discriminatory and transparent access to data is key for the well-functioning of retail energy markets. With the deployment of smart metering, more data will be available bringing new challenges but also opportunities.

The Clean Energy Package (CEP) acknowledges that and introduces measures, foreseeing also the development of EU-wide implementing rules, to ensure that those eligible easily and timely access metering and consumption/generation data. This is while respecting applicable rules, for instance the General Data Protection Regulation when data is identified as personal. This way, data will be available as required, even close to real time, and to those entitled to access it – be it consumers, network operators, suppliers, third parties and service providers.

“Download my data”, and “share my data”, are two use-cases that capture consumers’ attention. They could be a good starting point for putting in practice the respective CEP requirements for access to data and serve towards delivering against its so-called ‘fair deal’ promise.

The purpose of this event is to touch base, and further inform the ongoing debate on what needs to be done to actually have energy data at our fingertips, and help create a competitive retail energy environment to the service of European consumers and businesses alike.

The respective interventions will accordingly focus on:

- The legal basis of data access and services in European Legislation;
- Data Access as enabler of new opportunities and benefits to all market actors;
- National practices, ongoing initiatives within the EU, for access to data and its governance; implications from expectations for data-driven energy services;
- How to operationalise regulatory and market requirements for safe, secure, and efficient access to data;
 - what to deliver first: “download/share my data”?
 - what to consider in the foreseen implementing acts for access to data and interoperability within the EU.

DRAFT AGENDA

Time	EUSEW Webinar: “Energy Data At Your Fingertips?!” 16/06/2020
10:00	Welcome and introduction to the session Catharina Sikow-Magny, Acting Director at the European Commission, DG ENER
10:10	Invited Speaker “Towards interoperability within the EU for energy data access and exchange” Constantina Filiou, Policy Officer for Smart Grids at the European Commission, DG ENER
10: 20	Presentation on access to energy data Patrick Caiger-Smith, Member of the Executive Committee at ESMIG and CEO at geo
10:30	Panel discussion Moderator: Manuel Sánchez Jiménez Team Leader for Smart Grids at the European Commission, DG ENER Panellists: — Monika De Volder, Energy Team Leader at BEUC — Michele Governatori, President at European Energy Retailers — Patrick Caiger-Smith Member of the Executive Committee at ESMIG and CEO at geo — Lucy Sarkisian, Chairperson at ebIX — Georg Hartner, Expert on energy data at GEODE — Georg Rute, Digitalisation Manager at Elering — Antonio Colino, EER Board member- coordinator metering data
11:20	Live Poll and Q&A
11:50 (10 min)	Closing remarks Dieter Brunner, President at ESMIG
